WORK EXPERIENCE

Django Dev

HaGa IT Solution

FastApi

RESTful API is accessed using the HTTP protocol.

Naming and URL structure consistently

will produce a good API

and easy for developers to understand.

URLs APIs are usually called endpoints in their calls.

Example of naming URLs / endpoints the good ones are as follows:

/users

/users/1234

/users/1234/photos

/usersMySQL CRUD

SQL Trigger Concept

April 2020 – January 2026
